

May 1966

MEMORANDUM FOR THE RECORD

SUBJECT: Unclassified Report on Two Week Institute:
The Computer and the Policy Making Community,
3-15 April 1966, Livermore, California

1. The co-directors, Drs. Davis Bobrow and Judah Schwartz, are writing an unclassified report for the Carnegie Endowment (sponsor) on subject Institute. There will be 100 copies for distribution by the Carnegie Endowment and the Public Information Officer of the Lawrence Radiation Laboratory.

2. Dr. Bobrow called me this morning to ask if the Agency would object to an unclassified appendix to the report in which the CIA participants would be listed with the others and identified as from CIA. He explained that the report would probably get fairly wide distribution to universities and private institutions.

3. In addition, the Lawrence Radiation Laboratory plans an article on the Institute for publication in Science Magazine. For this article Dr. Bobrow asked if the Agency would object to being mentioned as one of the participating organizations (no individuals to be named).

4. I checked the above questions with Mr. [redacted] Chief, Employees Activities Branch, Personnel Security Division, who gave me his approval for answering "no objection in either case".
